INTRODUCING

India's No. 1 REPLACEMENT TECHNOLOGY FOR WATERPROOFING

We innovate waterproofing applications which can replace the old traditional form of waterproofing.

Our aim is to design world's best waterproofing applications by innovating chemicals & their application processes.

KABU BOND

Acrylic based cementitious waterproof coating for multiple surfaces

KABU BOND is an acrylic based polymer modified cementitious coating system. It is a milky white liquid, which in combination with cement has excellent waterproofing and protection properties.

Areas of Application

- Terrace Waterproofing (without breaking old structure) (Old / new)
- Bathroom / Toilets Waterproofing (Old / New)
- Podium Waterproofing
- Basement exterior walls (New)
- Exterior wall repair coating for old structures.
- Primer Coat (Before Paint)
- Admixture for Plaster

The ULTIMATE WATERPROOFING

How to apply ?

KABU LOCKSIL

Hydrophobic waterproofing with Nano Technology.

KABU LOCKSIL is a Water/Solvent-based Non-film forming coating for all round protection of porous Building Materials from Water Ingress. It combats water penetration, leaching, acid rain deterioration, harmful effects of humidity, efflorescence and provides protection against moss and fungal growth.

Areas of Application

- Base coat on concrete surface.
- Top coat on concrete surface
- Top coat on paints interior / exterior walls
- Top coat exterior landscapes
- Top coat on any type of stones having porosity.
- Top coat on Red Brick.

Water repellent coating without film formation.

How to apply ?

KABU HEAT

Antibacterial UV **PROOF**

coating with heat reflection.

KABU HEATPROOF is a revolutionary radiant barrier coating designed to combat solar heat gain in summer and heat loss in winter, providing effective thermal insulation. By reflecting solar heat and minimizing absorption by roofs, walls, and ceilings, It ensures optimal comfort levels in both air-conditioned and non-airconditioned spaces. Its easy-to-use application makes it a cost-effective solution for enhancing comfort and reducing energy consumption in buildings

Areas of Application

- Concrete terrace
- Metal Roofs
- Cement Sheets
- Industrial Sheds
- POP Sheets

2 in 1

Heatproof + Waterproof

How to apply ?

KABU CLEAR COAT

Clear coating
with UV protection & Waterproofing

KABU Clear Coat is a unique Nanotechnology based Clear Top Coat which gives >5 years of High Surface Durability and cut down repetitive maintenance needs for various exposed stone structures and Facades. It has Hydrophobic properties and prevents Water and humidity ingress from damaging the substrate. It also helps prevent fungal and mold growth on the stone surface, prolonging the beautiful look.

Areas of Application

- Concrete surface
- Top coat on paints interior / exterior walls
- Top coat exterior landscapes
- Top coat on any type of stones
- Top coat on Red Brick.
- Top coat on Tiles

TRANSPARENT WATERPROOFING

How to apply ?

KABUSHINE

Industrial grade heavy duty polyurethane coating for multiple surfaces.

KABU SHINE is a two component aliphatic urethane with exceptional resistance to chemicals and ultraviolet light. Each component is factory packaged in ratio & ready for onsite mixing. The resin component is colored differently and hardener is clear to give a visual on complete mixing prior to use.

Areas of Application

- Industrial structural steel
- Water tanks & Swimming Pools
- Piping & walls in power water treatment plant
- Pulp & paper, chemical, petrochemical, food and beverage plants.
- Pharmaceutical production areas.
- Concrete floors.

Food Grade PU Coating

How to apply ?

KABU

Applications

KABU offers application solutions for all different levels i.e. standard applications which any one can do and premium application with an option of D2C.

Standard Applications Menu

Standard applications are designed for waterproofing with low budget. These applications can be done by anyone with ease.

Scan to know more...

Areas of Application

New Construction

- Basement Walls
- Bathroom / Toilets
- Podium
- Exterior Walls
- Terrace
- Garden / Roof Garden

Old Construction (without breakage)

- Exterior Walls
- Terrace
- Garden / Roof Garden
- Cement sheet roof
- Red Brick roofs

KABU

Applications

KABU offers application solutions for all different levels i.e. standard applications which any one can do and premium application with an option of D2C.

Premium Application Menu

KABU ALL WEATHER

Replacement of Brickbat coba on new terrace.
(Also available for old terrace without any breakage)

KABU ART

Replacement of roof garden.
(Also available for old terrace without any breakage)

KABU HEAVY

Heavy duty waterproof coating

KABU HOLD

Replacement of tiles in swimming pools
& Overhead water tanks

KABU STONE

Replacement of texture + primer + paint
on exterior walls.

KABU Connect

KABU offers collaborations at every different level. Not only to channel partners but also to an individual. You can know more about collaborations by connecting with KABU.

Collaboration Options

Channel Partner's

- Platinum Dealer
- Gold Dealer
- Silver Dealer
- General Dealer
- Stocikest

Agencies & Suppliers

- Advertising Agencies
- Digital Mktg Agencies
- Merchandise Supplier
- Event Management companies
- PR Agencies
- Outdoor Media agencies

Business Associates

- Architects
- Civil Engineers
- Estate Agents
- Freelancers
- Digital Mktg professionals
- Influencers
- Building material suppliers
