

Presenting

KABU

Waterproof with confidence

#KaroLeakageKabuMein

Importance of Waterproofing

- Prevents structural damage
- Prevents Waterborne disease
- Energy Efficiency
- Protects your belongings
- Protects your surroundings
- Increase life of structure
- Maintains cleanliness
- Increases Property Value

KABU

Waterproof with confidence

**International Technology,
Made in India, to Build India.**

Problems of Indian Waterproofing Market

Unskilled workers

Dependence on unskilled workers is unavoidable

Lack of training of Applicator

None of the brands invest in educating applicators

Lack of Innovative Products

Age old products are being manufactured by all leading brand.

Many Products required

Combination of many products together provide one water proofing solution increasing complexity and cost

Short-life of Solutions

Old technology and untrained application reduce the life of waterproofing solution

High cost of repair

Cost of repairs and rehabilitation are high

Difficult to claim warranty

Terms and conditions laid by brands makes it difficult to claim warranty

Misleading advertising

Claims made by brands in their advertising are misleading causing customer dissatisfaction

01

Advanced Technology

High-performance waterproofing solutions utilizing advanced technologies to ensure superior protection and durability

02

Simplified Application

Our premium products are designed for straightforward application, minimizing application time and effort

03

Most Cost Effective

Our premium products are designed for efficiency and ease of use, enhancing profitability of all channel members

04

Training & Klub Membership

Extensive training support via videos for applicators. Enjoy benefits of exclusive **KABU Klub** membership

1. KABU LOCKSIL

KABU LOCKSIL is a chemical which makes the surface hydrophobic and used during surface preparation before waterproofing application

2. KABU BOND

KABU BOND is a specialized chemical used as a mixture with KAPA G02 / W09 to create Cementous and elastomeric surface with better bonding ability on the surface to stop penetration of water

3. KABU CLEAR COAT

KABU Clear Coat is a acrylic based transparent protective layer to be applied to protect the surface application from UV rays. It acts as a lamination to our waterproof coatings

4. KABU HEATPROOF

KABU HEATPROOF is a heatproof compound which makes the surface UV reflective and also reduces heat absorption and the temperature of the surface during summers

5. KABU SHINE

KABU SHINE is Polyurethane compound which creates high elongation and strength on the surface applied. It also has capacity to hold stagnant water and also protects crack formation. It is a food grade in nature.

**All products come with up to
10 Years Warranty**

APPLICATIONS

KABU

Applications

Standard Applications

- Any one can apply
- Easy to Apply

Premium Application

- Creating luxury applications
- Replacement Technology

KABU LOCKSIL

Multi-Surface Silicone based Nano Technology Hydrophobic Coating

Base coat on concrete surface of terrace /
roof

Base coat on Cement / Asbestos sheets

Base coat on Red Bricks

Base coat on exterior walls (concrete / brick
/ plaster)

TDS is available on www.kabu.world/download

Surface preparation is mandatory for all application. Warranty shall be applied on www.kabu.world warranty section

www.kabuworld.com | #KaroLeakagePeKabu

KABU BOND

Acrylic based compound for Multipurpose use

Waterproofing of New Terrace

Repairing of Old Terrace

Waterproofing of New Side Walls

Repairing of Side Walls

New Bathroom / Toilers

Repairing of Old bathroom Toilets

Base coat on New Podium

Repairing of Old Podium

Waterproofing of Exterior Boundary Walls of basement.

Primer Coat on Exterior Walls

Ad-Mixture during preparing plaster

Crack Filling

TDS is available on www.kabu.world/download

Surface preparation is mandatory for all application. Warranty shall be applied on www.kabu.world warranty section

KABU CLEAR COAT

Multipurpose Water based Lamination Coating with UV Protection.

Top coat on Cementous surface

Top coat on Matt finish tiles

Top coat on Cement / Asbestos sheets

Top Coat on Black Stones

Top Coat on Exterior Paint

Top coat in Interior Paint

Top Coat on Texture Surface

Top Coat on Paver Blocks

Top Coat on Matt Marble / Granite Floorings

Top Coat on Heritage Stones

TDS is available on www.kabu.world/download

Surface preparation is mandatory for all application. Warranty shall be applied on www.kabu.world warranty section

KABU HEAT PROOF

Multipurpose Heatproof Coating for keeping the surface cool.

Top coat on Metal Surface

Top Coat on Cementous surface

Top Coat on Matt Tiles

Top Coat on Cement Sheets

Top Coat on Black Stones

Top coat on Exterior Walls

Top coat on Texture Surface

Top Coat on Paver Blocks

Top Coat on floor tiles

Top coat on Marble / Granite Surface.

Top Coat on Stones.

TDS is available on www.kabu.world/download

Surface preparation is mandatory for all application. Warranty shall be applied on www.kabu.world warranty section

KABU SHINE

Multipurpose Heavy duty 2k Polyurethane Transparent Compound

Areas of Application

1. Parking Area
2. Inside Water-tank
3. Swimming Pool
4. Water Fountain

Surfaces on which it can be applied

1. Top Coat on Cementous surface
2. Top Coat on Granite / Marble
3. Top Coat on Epoxy Coating
4. Top Coat on Painted Surface

TDS is available on www.kabu.world/download

Surface preparation is mandatory for all application. Warranty shall be applied on www.kabu.world warranty section

We have not only developed the best of the products but also tried to design applications for every different surface. All the application designed by us are tried and tested with all weather conditions.

These applications comes along with warranty upto 10 years from the company for material / application respectively. You can choose your application as per your need with different options available.

Premium Applications

POWER OF

5

1. KABU All Weather (7 Layer Coating)
2. KABU HEAVY (4 Layer Coating)
3. KABU Art (9 Layer Coating)
4. KABU HOLD (7 Layer Coating)
5. KABU Stone (4 Layer Coating)

This building is in

New Terrace Waterproofing

OLD METHOD

Applying Brick bat Coba

- Increases weight on surface upto 300kg per sqmt.
- High application time
- High in cost upto Rs. 240/- p.sqft
- Need to break before repair
- High cost and time for repair

NEW METHOD

KABU ALL WEATHER

- 7 Layer Chemical Coating
- Easy to apply saving time and cost.
- Light weight with upto 1mm DFT
- Fastest application starting @ 68/-* p.sqft.
- Can be applied on any surface.

New Terrace Garden Waterproofing

OLD METHOD

Artificial Garden

- Increases weight on surface.
- Blocks the flow of water on surface
- High in cost upto Rs. 350/- p.sqft
- Needs repair every year.
- High replacement cost.

NEW METHOD

KABU ART (Garden coating)

- 9 Layer Chemical Coating
- Easy to apply saving time and cost.
- Light weight with upto 2 mm DFT
- Fastest application.
- Starting @ Rs. 175/- per sqft
- Can be applied on any surface.

SWIMMING POOL & WATER TANK WATERPROOFING (No more tiles)

OLD METHOD

Cementous coating + Tiles

- Frequent damages on surface
- Low DFT of coating
- Low Tensile Strength
- Breakage and high maintenance of tiles
- High cost of Tile fixing.

NEW METHOD

KABU HOLD

- 7 Layer Chemical Coating
- Food grade application
- 7 Coats = upto 2 mm DFT
- **Highest tensile strength**
- Starting @ Rs. 181/- per sqft

EXTERIOR WALLS

OLD METHOD

Texture + Elastomeric Paint

- Texture is not equipped with waterproofing properties.
- Primer + Elastomeric paint is waterproof but is not sufficient for waterproofing.
- Creates dampness within few years.

NEW METHOD

KABU STONE

- 4 Layer Chemical Coating
- Easy to apply
- 2 Coats Waterproofing + 2 Coats Paints with rough look
- Starting @ Rs. 38/- p.sqft

Bathroom / Toilet / Podium / Basement Side Walls Waterproofing

Cementous Coating

- Old traditional form of waterproofing
- Low DFT
- Low Tensile Strength
- Low durability
- Low abrasion resistant

KABU HEAVY

- 4 Layer Chemical Coating
- Easy to apply saving time and cost.
- 2 Coats = upto 1mm DFT
- Highest tensile strength
- Starting @ Rs.74/- Per Sqft
